

Wellcome Centre for Integrative Neuroimaging Studentships

The **Wellcome Centre for Integrative Neuroimaging** (WIN) has four fully-funded studentships that will be awarded over the next two years (2019-20).

These studentships are available to students with a WIN Principal Investigator as their primary supervisor. Applications will go through the normal departmental admissions route with January deadlines in 2019 and 2020.

To be considered for this studentship, please submit an application for admission to the DPhil in Psychiatry. On the application form, in the section headed 'Departmental Studentship Applications', you must indicate that you are applying for a studentship and enter the reference code for this studentship "**19PSYCH03WEB**".

Entry to the WIN funding competition will be conditional on a departmental offer. The competition is open to home, EU and international students, but limited international places are available.

WIN encourages applications from students whose projects fit with one or more of the WIN themes:

- Cross-species
- Cross-scale
- Population and big data
- Clinical translational
- Open science

Applications will be ranked based on:

- Track record of student (academic attainment, research and other relevant experience)
- Quality of the project (importance, feasibility, likely outcomes)
- Strategic fit to the aims of WIN

If you have any questions, please email nancy.rawlings@ndcn.ox.ac.uk
